Product data sheet

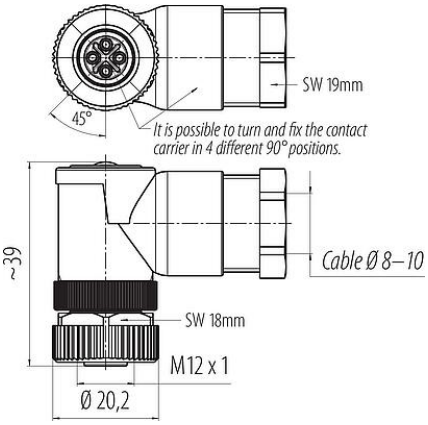

Automation technology - Voltage and Power Supply

Product description	**M12 Female angled connector, Contacts: 3+PE, 8.0-10.0 mm, unshielded, screw clamp, IP67, UL 2238, VDE**
Area	**M12-S**
Coding	**S-coded**
Series	**814**
Part no.	**99 0690 58 04**

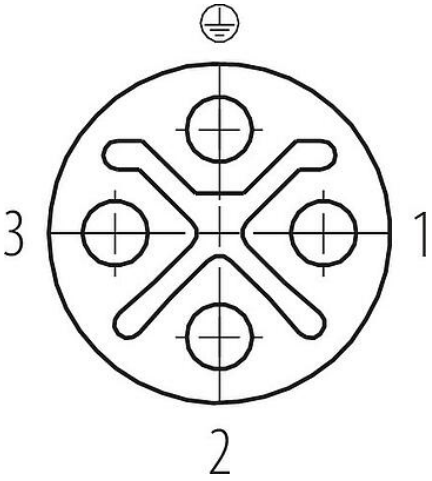

Illustration (may vary)

Scale drawing

Contact arrangement (Plug-in side)

Technical data

General features

Part no.	99 0690 58 04
Connector design	Female angled connector
Type standard	DIN EN IEC 61076-2-111:2018-10;VDE 0687-76-2-111:2018-10
Coding	S-coded
Version	Connector socket angled
Connector locking system	screw
Termination	screw clamp
Degree of protection	IP67
Connection cross-section	max. 1.50 mm² with ferrule / max. 2.50 mm² without ferrule / AWG 16 with wire-end ferrule / AWG 14 without wire-end ferrule
Cable outlet	8.0-10.0 mm
Twistability	90° (4 coding options)
Temperature range from/to	-40 °C / 85 °C
Mechanical operation	> 100 Mating cycles
Weight (g)	27.50
Customs tariff number	85369010
Country of Origin	DE

Electrical parameters

Rated voltage	630 V

Product data sheet

Automation technology - Voltage and Power Supply

Product description	**M12 Female angled connector, Contacts: 3+PE, 8.0-10.0 mm, unshielded, screw clamp, IP67, UL 2238, VDE**
Area	**M12-S**
Coding	**S-coded**
Series	**814**
Part no.	**99 0690 58 04**

Rated impulse voltage	6000 V
Rated current	12.0 A
Pollution degree	3
Overvoltage category	III
Insulating material group	III
EMC compliance	unshielded

Material

Housing material	PA
Contact body material	PA
Contact material	CuZn (brass)
Contact plating	Au (gold)
REACH SVHC	CAS 7439-92-1 (Lead)
SCIP number	8907a9ca-b735-4e7a-8809-7683fa6ccd90

Authorization/approvals

Approvals	UL 2238, VDE

Classifications

eCl@ss 11.1	27-44-01-02
ETIM 9.0	EC002635

Declarations of conformity

Low Voltage Directive	EN 60529:1991 | EN 60204-1:2018

Trade-Compliance

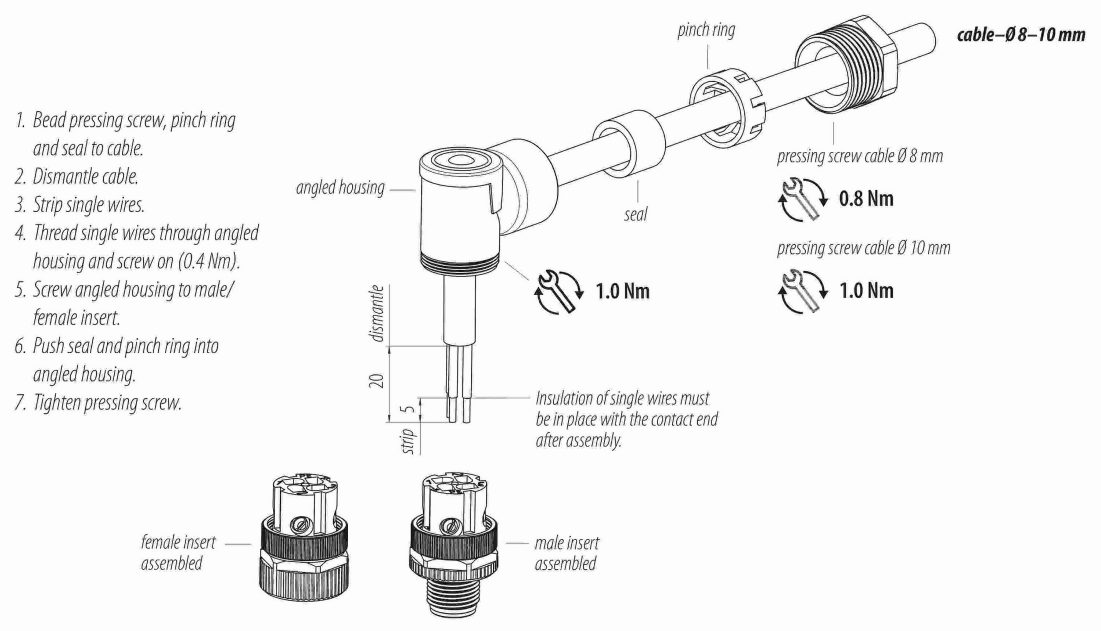

Copper (9903.78.01)	0.000221 kg

Security notices

The connector must not be plugged or unplugged under load. Non-observance and improper use can result in personal injury.

The connectors have been developed for applications in plant engineering, control and electrical equipment construction. The user is responsible for checking whether the connectors can also be used in other areas of application.

To protect against unintentional opening of the connector, the thread between the housing and the connector head must be secured with a suitable cyanoacrylate adhesive when used in circuits with voltages dangerous to the touch. This does not apply to connectors used in SELV and PELV circuits according to IEC 61140 (EN 61140, VDE 0140-1).

Connectors which are used in circuits with voltages dangerous to the touch may only be installed and used by, or under the supervision of, persons with electrical engineering training, taking into account the applicable regulations and standards.

The user must take suitable safety precautions to ensure that the connector cannot be accidentally disconnected.

Plug connectors with enclosure protection IP67 and IP68 are not suitable for use under water. When used outdoors, the plug connectors must be protected separately against corrosion. For further information on the IP protection classes, please refer to the "Technical Information" download centre.

Please observe the pollution degree and the overvoltage category. For further information, please refer to the download center "Technical Information".

To lock the cable connector with the device connector, the threaded ring is tightened "hand-tight" (approx. 60 cNm).

In the case of cable connectors with a metal threaded ring, it is imperative to ensure a connection with the PE protective contact of the appliance connector. Connecting cables between appliance connectors that are not connected to the PE contact are not permitted. The user must ensure a continuous connection of the protective earth conductor.
