

TRIM-T05

Torque Key Set for the installation of E01 connectors

The RFS Torque-Key Set is designed for the installation of RFS E01-Connector series.

Features / Benefits

Best electrical Performance of the connectors will be achieved only when using a torque key and the correct torque that is mentioned in the RFS installation instruction.

For easier installation and in order to get the highest possible quality of installation we recommend going for our Universal Trimming Tools (TRIM-SET*-*-*-*-**) in addition.
